

Abstract of the Disclosure

The invention relates to new polymerizable, luminescent compounds of formula I

5

I

10 wherein R¹, R², Q and L¹ have the meanings given in claim 1. Furthermore
the invention relates to polymerizable mixtures containing compounds
according to the invention and preferably at least one polymerizable
mesogenic compound. Polymer materials obtainable by polymerizing such
mixtures are also described. These compounds, mixtures and materials
15 show advantageous photoluminescent and/or electroluminescent
properties and may be used in light emitting devices and optical- or
electrooptical display elements.
